Add REPAIR-RETURN-DUE to report 011 - Daily Transition Register			The REPAIR-RETURN-DUE date is not currently printed on Report 011 - Daily Transition Register. Would like to include the REPAIR-RETURN-DUE date to the report				Add REPAIR-RETURN-DUE date under the DATES column on Report 011.			
343	Davis, Margaret	JSC	12/19/2002	New	12/19/2002	Low	RC	MEDIUM		
Items in an "out" status where the system allows you to make changes without any warning.			The system allows you to make changes to equipment in an "out" status and we find occasions where a transaction will be performed that should not be allowed. An example would be a borrowed out item and it gets excessed or a location change made to it.				JSC would like the system to bring up a "warning" when making changes to any item in an "out" status. This would allow an opportunity to verify whether you really want to perform that transaction and research any issues before the transaction is performed.

342	Davis, Margaret	JSC	12/18/2002	New	12/18/2002	Low	RC	SMALL		
Local Data Field	When inputting an I34 during the inventory process, you are required to put wording into the Local Data field. An I34 just means that the item was located, possibly in another location and that location will be updated when the transaction is processed. Appears to be an unnecessary added requirement.		JSC would like to recommend this requirement be removed; the only information we put in there is "co-located" or "located."							
341	Booth, June	MSFC	12/12/2002	New	12/17/2002	Medium	RC	SMALL		
Restrict Txn 46 Inventory by Exception	When performing transaction 46 (Cap/Sens and NSN Change) the user is able to change the User Number, National Stock Number (NSN), Capital/Sensitive Code, and Item Name. Currently, transaction 46 writes the Date Inventoried on the Daily Transaction file as the Current Date. The Date Inventoried on the NEMS Equipment file is not changed unless a user change on transaction is performed. Inventory Underage Discrepancies are being cleared for all parts of this transaction.		Transaction 46 should be changed so that a change of the User should clear the inventory discrepancy and update the date inventoried. The other parts of transaction 46 (NSN, Capital/Sensitive Code, and Item Name) should just update the equipment record with that specific information, create a daily transaction record, and not clear the inventory discrepancy.

340	Zurkin, Nik	MSFC	12/13/2002	Approved	12/13/2002	Medium	RC	MEDIUM	6.0	06/20/2003
Change control threshold to \$5000			The control threshold for cap sens code 'Q' items is currently \$1000. The requirement is to change the threshold to \$5000.				Modify the edits to change the control threshold for cap sens 'Q' items to \$5000. A conversion program to change all cap sens code 'Q' items under \$5000 to cap sens code 'X' may be needed.			
339	Tennille, Geoffrey	LaRC	10/31/2002	Approved	11/15/2002	Medium	RC	SMALL		
Responsible NASA individual on web site			According to the Langley Information Technology Security Manager (Geoffrey Tennille) the web front end for NEMS is not in compliance with NASA policy about identification of a responsible NASA individual.				Add a responsible NASA individual to the web front end for NEMS.

Study for making 1602 electronic		The current 1602 is produced on a 4-part form. These printers that these forms are printed on are becoming obsolete and need to be replaced. The forms are in need of a revision and should be redesigned and replaced with a more economical way of being produced.					Study alternative ways of producing the 1602 form (laser, Informed form, etc).			
330	Zurkin, Nik	MSFC	05/13/2002	Scheduled	07/02/2002	High	RC	EXTRA LARGE		
Centralize NEMS application		The NEMS system currently exists in a distributed environment at All Centers. There is duplication of software and storage requirements. Duplication of personnel resource requirements exists. The NEMS Central database exists only because of the distributed process.					Consolidate the NEMS system into a single database that will be used by all centers. The consolidated NEMS should accommodate varying levels of user access to data (data for a specific center, all data for the Agency, and Agency level access to specific data). All reports, adhoc, and input screens will be designed to report data based on the requestor's access privileges.

INADEQUATE DESCRIPTION DATA FOR PERSONAL PROPERTY CONTAINED IN NEMS DATABASE		NEMS NEEDS TO DETERMINE WHAT EXISTING OR FUTURE PLANNED NASA COMPUTER SYSTEMS CONTAIN THE ABOVE DESCRIPTIVE DATA AND DEVELOP APPPROPRIATE INTERFACES TO SHARE THE DATA. (i.e AUTOMATED PROCUREMENT DATABASES, FINANCE AND RECEIVING DATABASES, MAINTENANCE AND REPAIR DATABASES, FLEET NANGEMENT DATABASES (VEHICHLES AND AIRCRAFT) AND ADPE DATABASES) NEMS NEEDS TO ANOTHER SCREEN THAT WOULD JUST CONTAIN COMMERCIAL DESCRIPTIVE DATA ABOUT THE PROPERTY AND ITS CAPABILITIES. THIS MAY INCLUDE SEPERATE FIELDS FOR SPECIFIC DATA BY FSC TO PERMIT USEFUL REMAINING INFORMATION. THE ATTACHED GUIDE FOR DEVELOPING SALES DESCRIPTION FOR PROPERTY BY FSC MAY ASSIST IN DEVELOPING THE KEY DATA ELEMENTS.					See attached sheet.
